

Why RST™

Rapid Spreading Technology (RST) features aggressive tillering and rhizomes; creating a knitting effect that leads to improved density, recovery, traffic, disease tolerance, and improved overall quality of the surface.

Why the Consumer Will Care

Rapid Spreading Technology (RST) includes unique quick establishing Kentucky Bluegrass that makes this product work. RST creates a healthier turfgrass that will thrive in a multitude of environments resulting in a lusher, denser, stronger surface that can handle the demands of turfgrass professionals everywhere.

Active Rhizomes

The active rhizomes and improved tillering creates a spreading effect for improved density promoting survivability in the harshest environments.

Improved Performance

RST is improved performance in areas that turfgrass professionals need it - root development, recovery, traffic, disease tolerance and overall turfgrass quality.

RST - Rapid Spreading Technology Products

Products:

► **SUNGOLD RST**
Tall Fescue + RST

► **PURESPORT RST**
