

## THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

### Variety information

#### Description:

Desert Dream stands out as one of Pure-Seed Testing's top tier Kentucky Bluegrass varieties. The variety consistently demonstrates exceptional drought tolerance and summer performance in numerous trials, showcasing just one of its many turf characteristics. Desert Dream's other turf traits include shade tolerance, dollar spot, powdery mildew and rust resistance.

#### Geographical Adaption:

Desert Dream is adapted to well-drained soils with a pH of 5.5-7.5. Desert Dream performs well in the northern climates down through the Transition Zone of the United States. In addition to the United States, Desert Dream will perform well in Europe and China. Fertilize at 3-4 lb N/1000 sq. ft/year. Mowing height 0.5-2.5 ". Irrigate deeply and infrequently in absence of rainfall.

#### Applications:

Desert Dream has good summer performance making it great for home lawns. Desert Dream will perform under disease pressure and has good resistance to powdery mildew, dollar spot, and rust. Desert Dream's shade tolerance makes it ideal for sport stadiums or other shady turf areas.
