SUN HAWK

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Sun Hawk PR comes out of the innovative breeding efforts of the PST research program. Sun Hawk has remarkable drought tolerance and has been qualified by the Turfgrass Water Conservation Alliance. It has strong disease resistance to gray leaf spot and red thread. Sun Hawk has improved traffic tolerance.

Applications:

Sun Hawk provides extreme drought and traffic protection making it the perfect selection for sport fields and home lawns. Add in its excellent disease resistance and turf performance and this cultivar is your best choice for an all-around cool season turfgrass. Sun Hawk performs well as a mono stand or a component in a cool season mix or blend. Rest assured with quick establishment in cool temperatures Sun Hawk will give you the leg up when preparing for the season ahead. Sun Hawk is an excellent choice for high traffic sports fields, golf course overseeding, home lawns and sod farms.

Geographical Adaption:

Sun Hawk thrives throughout the cool-season and the northern areas of the transition zone as a permanent turf application. It is frequently used in the fall/winter overseeding of dormant Bermuda in the south. Seeding rates for home and landscape use range from 7-10 lbs./1,000 sq. ft. (294-490 kg/ha). For athletic fields, golf course overseeding, and sod farms a range of 450-650 lbs./acre (204-295 kg/ha) is adequate. Sun Hawk can handle mowing heights from .25" to 2.5" (1.27-10 cm) with exceptional turf density.
