

## THE FOUNDATION OF EXCELLENCE

A research first approach to perfecting turfgrass performance

### Variety information

**Description:**

Flightline perennial ryegrass was developed by Pure-Seed Testing Inc. It's dark green color and good winter color makes it stand out from other perennial ryegrass varieties throughout the year. Along with dark green color, Flightline has great disease resistance. It's crown rust and grayleaf spot resistant give it a leg up when it comes to turf quality.

**Applications:**

Flightline provides a dark green color, a high turf quality, and strong winter color, making it the perfect selection for home lawns, athletic fields and golf courses. It has excellent resistance to gray leaf spot and crown rust, making this cultivar one of your best choices for an all-around cool season turfgrass. With flightline, you can confidently embrace the vibrant winter hues in chilly weather, giving you an advantage when preparing for the next season.

**Geographical Adaption:**

Flightline is adapted for temperate climates. It is frequently used for fall/winter overseeding of dormant bermudagrass in warmer climates. Seeding rates for home and landscape use range from 7-10 lbs./1,000 sq. ft. (340-490 kg/ha). For athletic fields, golf course overseeding, and sod farms a range of 450-650 lbs./acre (500-730 kg/ha) is adequate. Flightline can tolerate mowing heights from .25" to 2.5" (0.63-6.3 cm) while keeping exceptional turf density.

#### PRODUCT FEATURES

High Turf Quality	● ● ● ● ●
Crown Rust Resistance	● ● ● ● ●
Dark Green Color	● ● ● ● ●
Gray leaf Spot Resistance	● ● ● ● ●
Winter Color	● ● ● ● ●
Seeding Rate	7-10 lbs /1000 sq. ft (340-490 kg/ha)
