

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Premium Grass Seed for Sports Applications

PERFORMANCE

Through years of dedicated research, Pure Seed has been a leader in developing elite turfgrass varieties. Sports Turf Managers demand the absolute best of their athletic fields. **PURESPORT** has been designed to answer their needs—rapid establishment, incredible wear tolerance, fast recovery, and superb turf quality are just a few attributes that make this brand ideal for professional use.

PURESPORT BLENDS

Whether you're planting a little league field or preparing for the big leagues, you can rest assured that **PURESPORT** athletic field mixtures and blends have the performance data engineered into each and every variety. **PURESPORT** is a proprietary perennial ryegrass/Kentucky bluegrass mix of top performing varieties developed by Pure Seed specifically for sports turf applications.

A HEALTHIER TURFGRASS

The Varieties selected for **PURESPORT** have been chosen based on the widest range of performance characteristics. These characteristics consist of disease resistance including: gray leaf spot, brown patch, red thread, and rust. **PURESPORT** also contains heat and drought tolerance, salt tolerance, and excellent wear and traffic performance. **PURESPORT** displays a dark green color and density at variable mowing heights ranging from .25" to 2.5".

PRODUCT FEATURES

Establishment Speed	● ● ● ● ●
Wear Tolerance	● ● ● ● ●
Recovery	● ● ● ● ●
Disease Resistance	● ● ● ● ●
