

THE FOUNDATION OF EXCELLENCE

A research first approach of perfecting turfgrass performance.

Variety information

Description:

Kickstart Kentucky bluegrass is the latest, exceptionally fast-establishing KBG variety to enter the market. Similar to Jump Start, Kickstart was selected for its superior ability to establish at rates comparable to perennial ryegrass. Additionally, Kickstart offers resistance to leaf spot. Unlike other Kentucky bluegrass varieties that go dormant in colder weather, Kickstart maintains its vibrant green color throughout the winter and provides early spring green up, enhancing the landscape even during the off-season.

Applications:

Kickstart features vibrant winter color, making it an excellent choice for colder climates. Its impressive resistance to leaf spot makes it ideal for home lawns, sports stadiums, or other shaded locations. With a robust root system, Kickstart establishes quickly, making it a solid option for new lawns or areas where the turf has been damaged.

Geographical Adaption:

Kickstart is adapted to well-drained soils with a pH of 5.5-7.5. Kickstart performs well in the northern climates down through the Transition Zone of the United States. In addition to the United States, Kickstart will perform well in Europe and China. Fertilize at 3-4 lb N/1000 sq. ft/year. Mowing height 0.5-2.5". Irrigate deeply and infrequently in absence of rainfall.

PRODUCT FEATURES

Spring Green Up	● ● ● ● ●
Leaf Spot Resistant	● ● ● ● ●
Rapid Establishment	● ● ● ● ●
Winter Color	● ● ● ● ●
Seeding Rate	2-3 lbs /1000sq. ft (125 kg/ha)
